

EN

Legend (UVD)

Max. print area = max. motif size

Please note that for technical production reasons the print motif may be distorted or faded on sloping edges and indentations.

In the case of non-continuous surfaces (e.g. buttons, cover flaps or adapter plugs), all-over printing may result in interruptions in the motif or an incomplete printed image. Take this into account when placing important motif components such as logos and texts. The background design can extend to the edge of the maximum print area.

Due to the nature of the item's surface, we cannot guarantee 100% colour and stand accuracy. This is especially true for repeat assignments.

We reserve the right to make changes to the templates for technical reasons!
