## YOUR VISUAL PROOF

Butterfly & Bee Mixture This seed mixture contains up to 30 different varieties and has been carefully selected to attract butterflies, bees and other insects to the garden. These flowers will provide a natural habitat and food for many insects and birds. Sow from late March to June or in early autumn. Prepare an area of soil in a sunny part of the garden. Sprinkle your seeds, rake lightly and gently firm down. Keep the area well-watered until the seedlings appear and then water as required. Germination usually starts from 14-21 days. Annuals will flower in the first season with biennials and perennials flowering in the following year.

## **Artwork Advisories**

**Full colour printed colours may differ** when printed to the final product.

It is the customer's responsibility to ensure that the proof is correct in all areas. Please be sure to double-check spelling, grammar, layout and design before approving artwork. **Due to the variation in monitor colours and adjustments, PDF proofs may not provide an accurate colour representation of the final product & printed work.** Once artwork is approved, your order will be processed based on the above unless any amendments are made. All orders are subject to our terms and conditions.

Please email all approvals/amends to your order processor.
